

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PREFACE.

---

THE Library of the Society of Antiquaries is the result of accidental accumulation rather than of studied design. It is chiefly composed of presents, and therefore, while deficient in not a few of the most necessary works on archæological subjects, it contains many not to be found in Libraries of much greater extent.

In order that a Library such as this may be of use to the Fellows, many of whom reside at a distance, it is indispensable that some List of its contents should be at their command.

The Council of the Society have been for some time anxious to improve and increase the collection, so as to render it worthy of the name and position of the Society; and they have now devoted an annual sum for the completion of imperfect, and the purchase of useful, works.

Should such improvements and additions be made, any kind of Catalogue now published would in a short time become almost useless; and it has therefore been deemed expedient that this List should be brought out in a very compendious and inexpensive form.

Another advantage which it is hoped may be derived from the List is, that it will indicate to Fellows the deficiencies, and induce them to supply them from their own libraries. The

Council are encouraged in this hope by the numerous valuable works which have been presented to the Society since attention was first called to the subject.

It should be stated, that the present List was commenced some years since, and has been continued and revised by several hands. After some progress was effected, each who succeeded to the task, in order to economise time and labour, made free use of what had been already done, rather than commence entirely anew. Some deviations from uniformity may have thus arisen, and probably not a few inaccuracies may have escaped notice on the general revision ; yet it is hoped that this List, with all its imperfections, will be acceptable, and indeed serviceable, to the Fellows.
